About HBT Systems

healthcare solution industry.

HBT Systems is well known in the health care industry as a reputed, trusted and professional team — a designation gained by achieving exceptional business results and a consistently high degree of customer satisfaction.

We continue to strive on our development with new initiatives to further provide our valued customers with new features to address future trends and technology advancement

Our strength is the domain knowledge and our ability to build robust and dynamic business solutions software for the health care sector

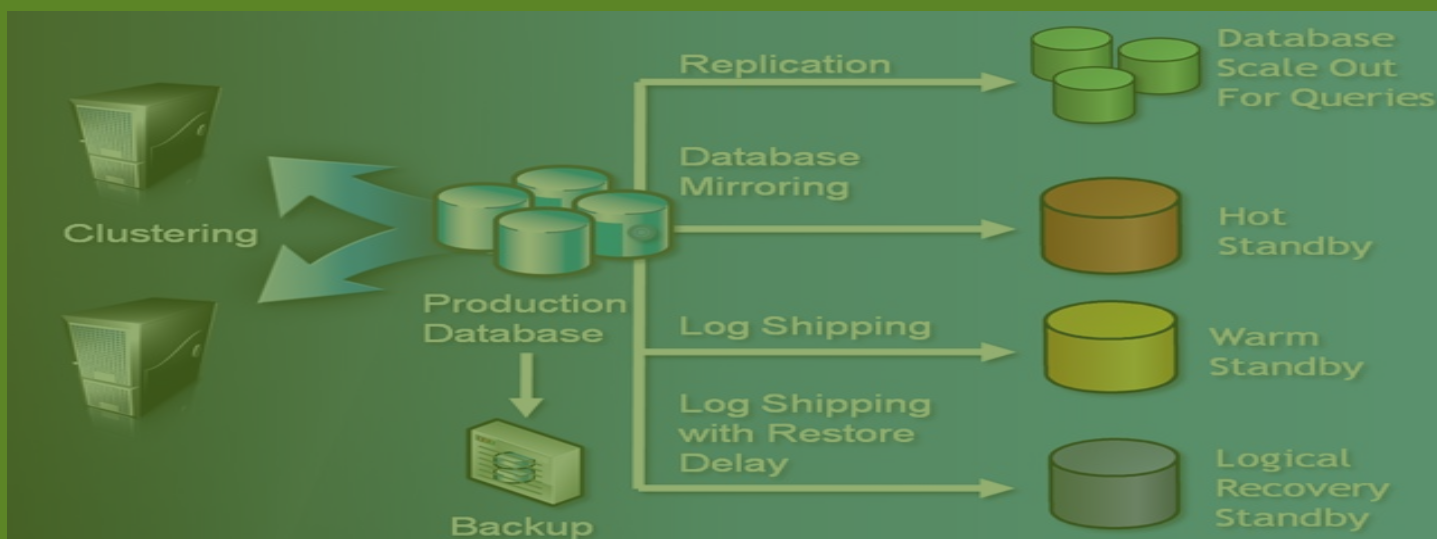

Robust & Scalable Architecture

Front End (Development Tool) of the Software is Visual Basic The Back End (Database) is the most commercial MS SQL Server. This system will operate on a Multi User, 3 Tier, Client / Server Architecture ensuring very high data security

Thanks to the large data holding capacity of SQL database and very much optimised connection method of our application, we maintain years of records on-line, to provide better management information and fast retrieval of historical data

Our Application does not maintain Client-Server Connection full-time. It retrieves record sets in "Batch Optimistic" method, which Microsoft offers and drops the connection. When updating, having established the connection again, the record sets are forwarded to the server, Once the updating confirmed by "commit tras" Then the connection is dropped again, minimising load on the server in large scale. As a result of this optimising technology you may introduce 10 times more clients than in conventional environment

Testimonials.....

To whom it may concern,

We at Hemas Southern Hospitals, Galle have been using the Systolic system as our main front end system. It satisfies our main operational requirements both in terms of transaction processing and reporting.

The following modules of SysTolic are in use at our hospital.

1. Channeling
2. Laboratory
3. Health Check Packages
4. Consumptions
5. OPD Billing
6. IP Billing
7. Cashier Sessions
8. Notifications
9. OPD Pharmacy
10. Pharmacy Stores
11. General Stores
12. Ward Stocks
13. Supplier Management

We found the software to be stable and user friendly.

We recommend SysTolic for any Hospital seeking the above functions.

Thanking you,

Yours faithfully,

Linus Jeganathan
Director - Finance

To whom it may concern

I take pleasure in issuing this testimonial to Mr. Faiz Ramathulla. His soft ware for a patient management system, Systolic, has been successfully implemented in many private hospitals and has been found to be very effective.

As some software solutions developed overseas were found to be unsatisfactory for local application, Faiz's solution was welcomed by the industry. While I was the Managing Director of the Asiri Group of Hospitals, Faiz developed this software to cater to the requirements of our hospitals and laboratories, and we implemented this system very productively and effectively.

I wish Faiz and his team a very successful future.

Ananda Wimalasena
Managing Director
Digasiri Medical Services (Pvt.) Ltd.

New Philip Hospitals (Pvt) Ltd.

18th Jan' 2010

Mr. Faiz Rahmathulla,
HBT Systems (Pvt) Ltd,

Dear Mr. Faiz,

Your SysTolic Patient Care System installed in our hospital has enhanced our services tremendously and helped in the smooth functioning of all the relevant departments.. Also we appreciate very much your prompt attention and communication skills at any given time.

We wish you and your team all the best.

Thank you,
New Philip Hospitals (Pvt) Ltd
